

**ANNEXATION PLAN NOTES:**

- Existing city limits & CCN boundaries shown are based on available information from AACOG, TCEQ, & TNRI.
- Proposed annexation area descriptions (metes & bounds) tied to the existing city limits boundary will be required.
- Service plans are required for annexation fiscal impact analysis.
- CCN boundaries for water & wastewater service should be amended to include existing city limits & proposed annexation areas.
- The Lakes Subdivision Area (Area A2) appears to be located within the Sunko WSC CCN and as such only wastewater service would be provided by the City.
- Area B1 appears to currently be located within the Oak Hills WSC CCN. The City should coordinate with Oak Hills to address CCN amendment for water service in this area or provide only wastewater service.
